Forecast for Tuesday 25 Jul 2023

Weather: Some sunny spells at first, but cloud will soon develop, with showers from late morning, becoming frequent for a time early afternoon. These will generally be light, but the odd heavy shower is possible later in the afternoon, particularly further north and east. Low risk of thunder.

Chance of cloud-free hill tops above 600m: 60%, becoming 90%.

Low Cloud and visibility: Patchy cloud around 500m at first, lifting by mid-morning to clear all but the highest summits. Lifting further during the afternoon and tending to break up slightly, with sunny spells possible during the evening. Generally good visibility, particularly during the afternoon and evening, but poor in early cloud and in any heavier showers in the afternoon.

Forecast for Wednesday 26 Jul 2023

Weather: Early low cloud will clear by late morning, with some bright or sunny spells for a time, and perhaps an isolated shower. Rain will arrive from the west late afternoon, becoming increasingly heavy and persistent through the evening.

Maximum wind: Southwesterly 10mph gusting 20mph

Chance of cloud-free hill tops above 600m: 70%

Low Cloud and visibility: Low cloud, base 300-400m at first. This will clear by late morning, with only high cloud for a time, well above summits. High cloud will thicken and lower later in the afternoon, with cloud becoming extensive from 300m during the evening. Good visibility once low cloud has cleared, until rain becomes widespread early evening.

Temperature: **Valleys:** Plus 18C
At 600m: Plus 15C
Freezing level: Above the summits
